## **Abstract**

Comprehensive and detailed orientation beyond leaf level is the hallmark of robust ERM framework and its implementation.

It would not be possible to have ERM program without having framework in place. The framework leads us to the required launch platform to assess risk appetite and implement the ERM program in an Organization.

We will write briefly on ERM program and its implementation along with high level ERM implementation process maps. We will not provide further details on this and move on to the risk appetite framework, definition & assessment as the objective of the paper is to define and assess the risk appetite and to implement the same.
